

ABAS High security fence

Description

ABAS Protect supplies the market with all kinds of perimeter protection. Security level 4 designates custom tailored solutions for different types of high security facilities.

Together with our clients, we develop various proposals. Raw materials of best quality combined with our own design and production guarantee quality from design to finished product and final assembly.

All material is hot-dip galvanized according to UNI-ISO 1461, Sendzimir processed material is powder coated, and all details are in stainless steel.

Fences

- Expanded metal fencing
- Steel mesh panels
- Fine-meshed welded nets
- Concrete walls
- Steel and concrete combinations
- Composites

Gates

- Gates are designed aesthetically to fit the fence.
- Gates are dimensioned to match the strength of the fence.

References

We do have a number of reference facilities to showcase, whenever security allows us to.
