

Description

The mansion gate series is an exclusive residential gate alternative with high quality and exquisite design. Swing and sliding gates, as well as fence, are tailored to the customer's needs and preferences, for a perfect fit with house, garden, entrance and exit. Apart from design and appearance, demands on easy installation, great protection and long lifespan have been the key elements in design and construction.

Surface treatment

Each section is protected against corrosion by hot-dip galvanization. After galvanization, each part is separately powder coated. Other parts for assembly are made of stainless steel. Panels, posts and gates may be coated in most colors in the RAL scale.
