

# ABAS preschool gate BS-16

## Description

ABAS Protect's preschool gate BS-16 consists of sturdy gate posts, a profile filled gate frame, and details. All-welded netting with 4 mm wire and mesh size 40 x 40 mm ensure adequate protection. Standard models are hot-dip galvanized and optionally powder coated in standard colors moss green, olive green or black.

The gate may be equipped with locks, as described below.

ABAS preschool gate BS-16 may be installed as a single walking gate or as a double driving gate. Double gates always include ground pin. Gate leaves are available in heights of 0.8 m, 1.0 m, 1.2 m and 1.5 m. Gate leaves can be combined to achieve clear openings from 1–4 m, in combinations with leaves of 1 m, 1.2 m, 1.5 m, and 2 m. See attached reference — note that casting dimensions depend on lock type!

Dimensions of the preschool gate are constructed with regard to the security of the children.

Locks: i) GL-4 and fitting lock can be used independently, or in combination. ii) Locinox can be used independently, or in combination with two-handed lock.

## Lock combinations

<u>Lock</u>	<u>Independently</u>	<u>Combination</u>
