

## Description

ABAS Protect's residential gate is a sturdy gate developed with focus on quality, durability and economy. The gate consists of 60 x 60 mm gate posts, profile filled gate frame and all necessary details. Standard models are hot-dip galvanized and optionally powder coated in standard colors moss green (RAL 6005), olive green (RAL 6013) or black (RAL 9005).

The residential gate is equipped with locks (including cylinder) and pressures. For further increased security, gate locks can be supplemented with a latched knob, which requires both pushing and turning simultaneously.

ABAS Protect's residential gate may be installed as a single pedestrian gate or as a double driving gate. Double gates always include ground pins. Gate leaves are available in heights of 0.8 m, 1.0 m and 1.2 m. Gate leaves can be combined to achieve clear openings from 1 m to 4 m, in 0.5 m intervals.
